

Roof Walkway Matting

All weather safe access

- **Permanent slip resistance.**
- **UV resistant.**
- **Protects roofing membranes.**
- **Open grid and self draining.**
- **Easy to lay and maintenance free.**

Crossgrip is used on flat roofs to provide safe access for maintenance of roof top services. The matting is designed to be completely impervious to all weathers and its 14mm height provides permanent slip resistance, even in areas where water may pool.

Its life is equal to or will exceed that of modern flat roofing materials. Crossgrip does not react with vinyl roofing membranes whilst offering continual protection to the roof's covering from pedestrian traffic.
